

PROCUREMENT INTELLIGENCE

Find the right public opportunities. Know why they fit.

A four-week, human-reviewed founding pilot for specialist UK suppliers pursuing complex public-sector work.

£250 including VAT	4 weeks fixed pilot period	1 + 1 supplier profile + priority sector
------------------------------	--------------------------------------	--

THE PROBLEM

Public opportunities are spread across changing notices, portals and market-engagement activity. Keyword alerts rarely explain whether an opportunity genuinely fits your capability, which evidence is missing, or whether the likely bid effort is justified.

Edge Agents AI combines focused monitoring with experienced human review. We show the source, separate fact from inference, expose uncertainty and turn a notice into a practical qualification decision.

GOOD FIT

Nuclear | Fusion | Defence | Advanced engineering | R&D; | Public-sector technology

WHAT YOU RECEIVE

A repeatable decision pack, not another alert feed.

1. Supplier capability profile We agree what your organisation can credibly design, manufacture, integrate or deliver; your relevant standards, locations, delivery models and exclusions; and the evidence available to support those claims.	2. Focused opportunity monitoring We monitor one agreed priority sector and filter new or amended public opportunities against that profile. The goal is relevance, not volume.
3. Human-reviewed weekly brief Each brief summarises the opportunity, source status, timing, route, fit, evidence gaps, disqualifiers, likely effort and unanswered questions.	4. Bid / no-bid decision support You receive a bounded posture: proceed, qualify, partner, reprice or stop - together with the reasons and triggers that would change the view.
5. Amendment monitoring Material notice changes are flagged and the assessment is revised where dates, scope, evidence requirements or commercial conditions change.	6. Closing review A 30-minute review at the end of week four captures outcomes, missed signals, useful evidence and whether a repeat service would create measurable value.

WHAT “SUPPLIER CAPABILITY” MEANS

Describe the work you want us to match - in customer language.

Example: “We design, manufacture and install safety-critical stainless-steel containment and shielding systems for regulated nuclear and research sites. We deliver from concept and detailed design through fabrication, factory acceptance testing and site installation. We hold ISO 9001 and have UK delivery capacity. Exclude civil construction-only packages.”

Include your products or services, typical work packages, delivery stages, relevant sectors, standards or accreditations, geography, scale, partner needs and anything we should exclude. Do not submit classified, security-sensitive or confidential bid material.

HOW THE PILOT WORKS

From order to evidence in four controlled steps.

1	Order and payment Submit billing and scope details. A unique payment reference is created. Pay £250 including VAT by bank transfer. We issue a VAT invoice.
2	Scope confirmation We check fit, agree one supplier capability profile and one sector, confirm exclusions and set the start date. Delivery starts only after cleared payment and written activation.
3	Four-week delivery We monitor, assess and deliver human-reviewed briefs. Facts, supplier claims, inference, gaps and portal checks remain visibly separate.
4	Close and decide We review useful opportunities, decisions and missed signals. There is no automatic renewal. Any continuation requires a separate written decision.

THE VALUE

The pilot should pay for itself in better decisions.

The value is not the number of notices forwarded. It is the avoided time spent qualifying weak opportunities, the earlier identification of partner or evidence gaps, and the improved chance that scarce bid effort is focused on work the supplier can credibly win and deliver.

Less noise	Faster qualification	Visible evidence
One bounded profile and sector.	Clear proceed, qualify, partner, reprice or stop posture.	Sources, gaps, amendments and uncertainty retained.

IMPORTANT BOUNDARIES

The service supports your decision. It does not submit bids, contact buyers, make contractual commitments, guarantee that every opportunity will be found, or replace legal, compliance, security or technical assurance. The customer verifies its own capacity, credentials and bid position.
